Water researcher Dr. Pollack says in his book: "Water research is standing far behind today. Only very few daring scientists dare to venture into water. Promising approaches to water research were nipped in the bud in the middle of the 20th century."

The mechanism has been the same for centuries, only the names of the institutions that are

arbitrarily appointed to a kind of thought-, opinion-, or science police change. Currently, they are gladly called "fact-checkers". They are always positioned as "free", "independent", "neutral", absolutely credible institutions whose publications should simply not be questioned. Before we post the film "Heart of Gold" in this channel, we want to give you a few tips that can help you check out the credibility of the "fact-checkers".

Tips for checking out fact-checkers

It's good.
to be truu.
